Class description:
This class is an overview of two major aspects of the structure of Contemporary Standard Russian: morphology - which is concerned with the structure of words, and syntax - which deals with the structure of phrases and sentences. The class will also serve as a general introduction to generative linguistics.

Goals:
• Achieve better understanding of the morphology and syntax of Russian
• Learn to perform linguistic analysis
• Become familiar with traditional and current work in Russian linguistics

Requirements:
• Class discussion and readings 10%
• Homework assignments 60%
• Final exam – problem sets and short questions 30%

Readings:

• Textbooks
Excerpts from these textbooks will be assigned:

• Research and review articles and book chapters
Readings will be distributed in class. Depending on the progress of the class, additional reading materials may be assigned, or some of the readings may be substituted for others.

**• Additional books you may find useful as reference**
